Best quality European softwood and hardwood

IM HOLZ s.r.o. is an international wood trading company based in Prague. More than 20 years of experience in wood industry helps us to build stable and reliable partnerships with suppliers and customers.

## **ABOUT US**

IM HOLZ s.r.o. was founded in 2014, as a logical development of individual activities of our lumber trading agents with over twenty years of experience. From its early days to the present day, the company has been trading in the EU, being one of the largest importers of Siberian larch sawn timber into European countries.

In the past few years, we have actively been developing international supply chains as well. Among our clients are woodworking factories throughout Europe, as well as in China, India, Vietnam, Egypt and South Korea. Since 2022, the company's main focus is the European timber trade. Among the products we offer are sawn timber from larch growing in Poland, the Czech Republic, Slovakia, and Austria, as well as spruce and pine lumber in wide range of dimensions. Beside softwood, we are also offering hardwood products (oak, beech, ash). To get more information about our products, please check the relevant section on the website.

We are pleased to offer our customers a complete organization of the process, from the selection of the required specification to delivery directly to the customer's warehouse.

# WOOD PRODUCTS

## SAWN TIMBER

### Softwood

#### **Dimensions**

thickness 22-250mm

width 70-250mm

length 2500-6000mm

#### **Processing**

rough, fresh or kiln dried, impregnated or steamed on request

### Hardwood

#### **Dimensions**

thickness 26-60mm

width 100-200mm

length 2100-4000mm

#### **Processing**

unedged or square edged, kiln dried or steamed

## PLANED TIMBER

We offer a large selection of planed material, glulam and solid wood panels. To get a full specification, please send as an inquiry.

Some of our standard products are:

- Terrace boards
- Profile wood for facades and balconies
- Glulam
- KVH – Solid Structural Timber
- Solid wood panels

## THERMOWOOD

We offer heat treated spruce and pine, suitable for indoor and outdoor use. Heat treatment improves the weather and thermal resistance of wood without using any chemicals, just high temperature and water vapor.

### **Dimensions**

thickness 22-63mm

width 100-200mm

length 2100-6000mm

### **Processing**

rough or planed

## PLYWOOD

Our current offer consists of birch plywood for interior and exterior. It is made of 100% birch thin veneers glued together, which makes it very moisture and thermal resistant, thus suitable for wide range of manufacturing.

**Interior plywood** is mostly used for flooring and furniture production. It is not prone to deformation, can bend easily, which makes it a great option for curved elements as well. It is thermal resistant and retains its properties in the temperature range of -40 up to +50 °C. It does not pass water, so the long-term presence of water causes swelling of veneer sheets.

**Exterior plywood** has increased resistance to moisture in comparison to interior plywood. It has exceptional strength and temperature resistance, which makes it a great option for construction work. It can also be used floor and furniture production, roofs, and scaffolding.

**Grades:** B/B, B/BB, BB/BB, BB/CP, BB/C, CP/CP, CP/C, C/C

## MATURED WOOD

We offer matured/retro wood made of spruce/fir and larch. This is a specially treated wood, made to appear old, sunburnt, and battered, but has properties which are similar to untreated, fresh wood.

### **Dimensions**

Same as standard dimensions of planed timber.

### **Processing**

Planed or brushed, dried or steamed
